PROFILE

A driven and adaptable software developer with knowledge of frontend and backend programming. Competent in leveraging frameworks like React, Next.js, and Django to secure online apps, build REST APIs, and establish database interfaces. Skilled in Python, Java, and JavaScript, with practical knowledge of MySQL and PostgreSQL.

PROJECTS

ModelMate | AI-User's Community
Django, PostgreSQL, REST APIs

- Developed a dynamic community platform enabling interaction among AI users.
- Implemented secure REST APIs to handle user data and established efficient database interfaces.

LTSR | Productivity App
React, Next.js

- Designed a productivity application with a unique concept to enhance user efficiency.
- Utilized React/Next.js to build a responsive, scalable frontend interface.
