

Jamil Ahmad Rupak

Dhaka, Bangladesh

01771823979

SWE at Algoclan

jhrupok@gmail.com

linkedin.com/in/jamil-ahmad-rupak

PROFILE

A driven and adaptable software developer with knowledge of frontend and backend programming. Competent in leveraging frameworks like React, Next.js, and FastApi to secure online apps, build REST APIs, and establish database interfaces. Skilled in Python, Java, and JavaScript, with practical knowledge of MySQL and PostgreSQL.

EXPERIENCE

Software Engineer (SWE)

Algoclan

- Developing and maintaining software solutions, optimizing performance, and building scalable applications.

PROJECTS

HealthTwin | AI-Powered Smart Healthcare Ecosystem

link:

- Designed an AI-powered patient-doctor platform delivering intelligent patient insights, symptom tracking, prescription assistance, and Digital Twin health monitoring.

ModelMate | AI Community Platform

Django, PostgreSQL, REST APIs

- Built a social platform for AI enthusiasts to collaborate, share knowledge, and interact through a secure web application.

LTSR | Productivity & Task Management Platform

React.js, Next.js, Django

- Created a modern productivity application that helps users organize tasks, improve workflow, and boost daily efficiency.
